FOR 1947

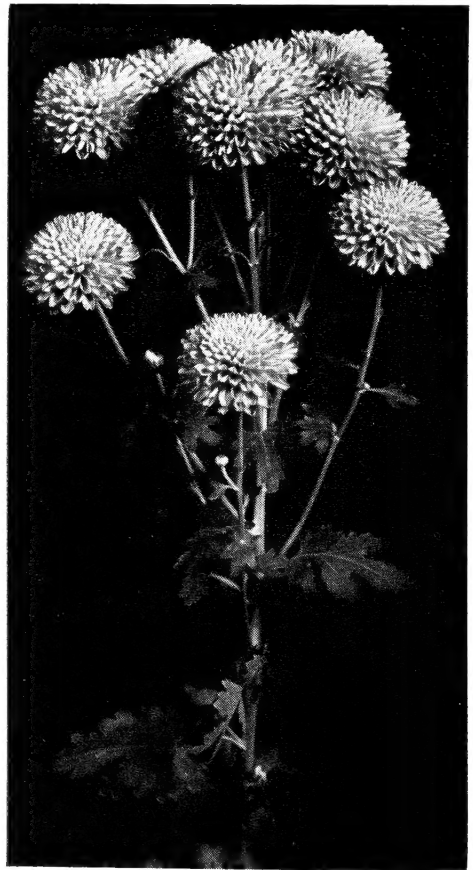

Three New Pompons

We are introducing for 1947 three new varieties of pompons with the same thrifty habit of growth as Gold Coast and Cotton Top. After being pinched, the new growth is straight up with a minimum of side shoots until the flowering growth appears. This throws all of the growing strength into an excellent spray and prevents the bench from becoming so crowded. This thrifty growth allows more air circulation, is easier to keep free of insects and facilitates quicker cutting and handling. They will quickly become your favorites to grow.

BONTON

Bright bronze color with a deeper bronze on the inside of the petals. The flowers are $1\frac{1}{2}$ inches in diameter with good substance, blooming October 20. Bonton is top quality with heavy production.

\$100.00 per 1000

DREAMBOAT

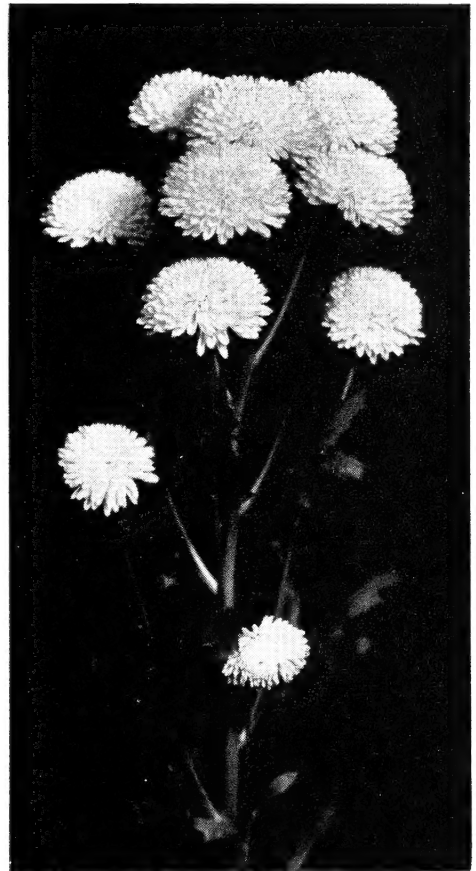

Bright glowing pink color, thrifty growth and heavy production will make Dreamboat the favorite pink pompon for early November. The flowers are medium size, good substance and placed on the spray to make the most showing.

\$100.00 per 1000

INDAGOLD

A fine bright yellow pompon blooming November 5th and resembling Gold Coast but blooming ten days later. The flowers are medium sized on an excellent spray. The growth is thrifty giving heavy production.

\$100.00 per 1000

LARGE FLOWERING STANDARD VARIETIES

WHITE—Standards

QUAKER MAID—White tinged with pink. Reflexed.....	Oct. 10
